

Make your own Claymation at Home

Materials you will need:

- Clay (any brand will be fine, I like to use modelling clay)
- Light or a lamp
- Shaping tools (optional)
- Camera phone
- A table that will not be disturbed for many hours
- Drawing paper or card to create different backgrounds and your sets
- Pens/pencils

Step 1:

You need to think of a storyline you might like to follow. I find it helpful to write this down.

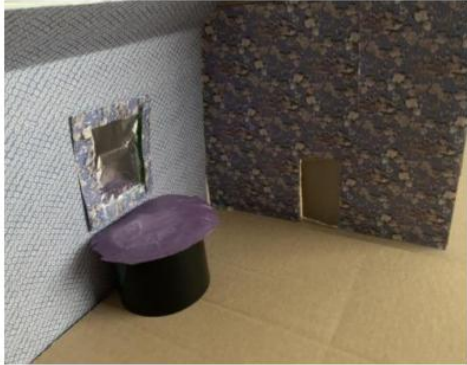

Step 2:

You need to create your model figures. You can make this as simple or as detailed as you feel comfortable with.

Step 3:

Create or draw some scenes to give your models a background.

Step 4:

You are now ready to shoot your film, you can download some apps for free, or purchase one if you want to spend a little bit of money. I like to use Frame by Frame as it's quite easy to follow.

Step 5:

Add your music, you can add your own music from your phone, some apps have music on them that you can use too.

Step 6:

Share your film with your family and friends. Don't forget to upload any pictures of your model creations or claymations to (#Summer in the city social media handle) to get involved from home with the festival.

Happy Claymaking!!
